

ChangeScape® is fuelled by our empirically-proven **Transformation Sciences®** methodology.

We are proud to have supported our client's delivery of world-first initiatives across multiple industries using these tools and methods. We bring together deep capabilities and a partner-based approach that is data-driven and harnesses the strengths of our clients' leadership teams.

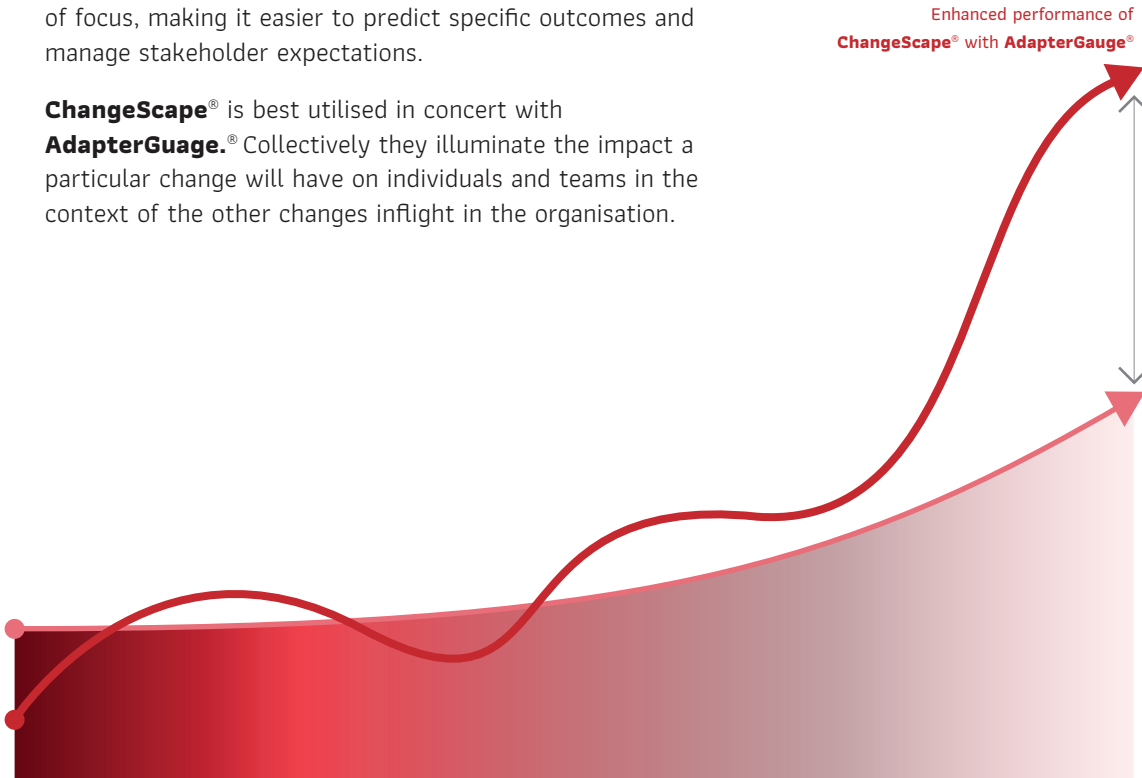

ChangeScape®

Focusing your change efforts

Why do I need it?

ChangeScape® helps organisations reduce risk across technology, process, structure, legal, cultural, and external elements and embrace change more rapidly. This builds a solid foundation for change planning by highlighting key areas of focus, making it easier to predict specific outcomes and manage stakeholder expectations.

ChangeScape® is best utilised in concert with **AdapterGauge®**. Collectively they illuminate the impact a particular change will have on individuals and teams in the context of the other changes in flight in the organisation.

“ Is this too much change all at once? Which areas of my business will be impacted by this change? Who will need the most help?

What is ChangeScape®?

Either an online assessment or a facilitated half day workshop where the size and impact of the transformation is assessed and priorities are set. This includes a review of impacted people, processes, technology, operations, and external factors associated with the transformation.

ChangeScape®
